

Socket Set Screw

Product # SSP1414MR

Screw Size 1/4

Thread Count (Pitch/TPI) 20

Thread Type Coarse

Length 1/4 in

DESCRIPTION

The set screw is used most often to assemble and secure two items. The screw goes through a threaded opening in the outside item to impede movement between the two items. This type of screw is used to prevent movement between two rotating parts, such as between a pulley and its shaft.
