

Socket Set Screw

Product # SSPF3838MR

Screw Size 3/8

Thread Count (Pitch/TPI) 24

Thread Type Fine

Length 3/8 in

DESCRIPTION

The set screw is used most often to assemble and secure two items. The screw goes through a threaded opening in the outside item to impede movement between the two items. This type of screw is used to prevent movement between two rotating parts, such as between a pulley and its shaft.
