

Wedge Concrete Anchor, Hex Head with Washer and Serration

Product # WABHDG124MX

Screw Size 1/2

Length 4 in

Bit Dimensions 1/2

Thread Count (Pitch/TPI) 2.5

Packaging format Blister of 4 units

DESCRIPTION

The Gator Bolt XXL, heavy-duty concrete screw fastener is a new generation of product for the construction market. The Gator Bolt XXL is a large diameter anchor with considerable pull-out values, tough corrosion resistance, simple to install, and the only large diameter concrete anchor that is also easy to remove.

ADVANTAGES AND BENEFITS

- Provides an alternative to typical wedge or sleeve with the benefit of a nicer fit and finish.
- Grips concrete without using compression; ideal for crack concrete situations or use near an edge, where wedges or sleeves cannot be used.
- Easy to remove (ideal for construction site safety railings).
- Length and size head markings allow for easy on-site inspection.
- Silver-Chem finish provides exceptional corrosion resistance and ACQ resistance (pressure treated wood chemical).
- Locking serrations under the head prevent back-out and increase resistance to vibration.
- Top strength: high pull-out and shear values.
- Low torque installation.
- Installs using standard ANSI masonry drill bits.

TECHNICAL SPECIFICATIONS

Product #	WABHDG124MX
Drive required	Hex
Finish	Hot-Dip Galvanized
Head Type	Hexagon with Washer and Serration
Point Type	Blunt
Brand	Gator Bolt XXL
Threading	Full thread
Concrete Drill Bit Included	Not Included
Minimum Hole Depth	2"
Minimum Insertion	2 in
Specific Application	Concrete
Standards and Certifications	ACQ Treatment
Material	Hot-Dip Galvanized Steel
Thread Count (PITCH/TPI) - Other Screws	2.5

APPLICATION

- Safety railings and equipment on construction sites - Balcony railings - Warehouse racking and garage shelving - Accordion and pull-down shutter tracks - Impact-resistant window systems

IMPORTANT INFORMATION

PLEASE NOTE *You must drill a hole 1 in (25.4 mm) deeper than the insertion intended.*
