

## Plain Wood Screw, Pan Washer Head, Square Drive, Regular Thread, Type 17 Point

### Packaging format

Box of 100

Box of 6000

### DESCRIPTION

#### Pocket screw without plating

Pocket-hole joinery, or pocket-screw joinery, involves drilling a hole at an angle (usually 15 degrees) into one workpiece, and then joining it to a second workpiece with a special screw. Clamping is not required. Glue is recommended, but not necessary.

### ADVANTAGES AND BENEFITS

The Type 17 point eliminates pre-drilling. It also prevents the wood from cracking and splitting. The regular thread provides reliable holding power, ensuring that the fastened components remain securely in place.

### AVAILABLE PRODUCTS

Product #	Packaging format
<b>PWK17P7114VP</b>	Box of 100
<b>PWK17P7114PR</b>	Box of 6000

## TECHNICAL SPECIFICATIONS

Head Type	Pan Washer
Drive required	Square
Screw Size	7
Length	1 1/4 in
Thread Type	Regular Twin Lead Thread
Point Type	Type 17
Finish	Plain
Function	Pocket screw
Brand	Reliable
Head Size	no. 7
Drive Size	#2 (Red)
Threading	Partial thread
Specific Application	Pocket Hole Screws
Type of Wood	Hardwood, Engineered Wood
Standards and Certifications	Not Certified
Material	Steel
Thread Count (Pitch/TPI)	15
