## DESCRIPTION

Fasten machine components, appliances, electrical boxes, handles, knobs, and more with these machine screws. They are constructed with 18-8 stainless steel for durability, performance, and rust resistance. The screws are easily secured with a Phillips driver and have a flat head that allows for flush and countersunk installation. Designed for use in a pre-tapped hole, the machine screws feature an imperial thread and a Type B point. They comply with the Industrial Fasteners Institute's ASME B18.6.3 standards.
